

Y-Type Globe

Up-right Globe Type

# Calm Check Valve (Model 137-010)

## Special Features

- Simple Design.
- Drip Tight Shut Off.
- Adjustable the speed of Opening and Closing.
- Preventing Back-flow.

Model 137-010 consists of Robocon Valve (BALEM 130) and Two Flow Controller. This valve is installed at outline of pump to prevent back flow caused by Back Pressure.

This valve is slowly opening to prevent sudden opening surges, When a pressure reversal occurs the higher downstream pressure is applied to the cover chamber through the control tube line, and the valve closes drip tight.

## Description

Description	Item
